

## 2017 Mosquito & Tick Reduction Program

**Get your yard back for just \$3 a day!\***

### We provide:

- An **organic monthly treatment** that targets all ticks and the 51 species of mosquitoes found in Massachusetts.
- Misting with *two products simultaneously*: An organic insecticide and an insect growth regulator.
- *Personalized* recommendations on steps you can take to further reduce the number of mosquitoes and/or ticks following a property inspection.
- Fogging of any sheds, foliage and trees, as well as under decks, to reduce mosquito populations; additional fogging at wood line, if applicable, will be done for tick reduction.
- Treatments that build on each other—the mosquito and tick populations will continue to decline from treatment to treatment.
- First class service and reassurance; all of our technicians are licensed in Massachusetts and have passed a background check.

### The program:

- Helps protect your family and friends against **Zika, Lyme, West Nile, and Triple E.**
- Decreases the risk of dogs and cats contracting Heart Worm, Lyme, West Nile, and Triple E.
- Runs through October unless canceled.
- Can be canceled by email any time after the second treatment.
- Costs \$90/month for properties one acre or less\*; \$45/month is added for each additional ½ acre.
- **Doesn't require a contract!**
- Requires a credit card or ACH on file.

### Notes:

- It may take up to two days for the first treatment to have a noticeable impact—it's not recommended to hold any outside gatherings on the day of the *first* treatment.
- **Do you have HEAVY TICKS? A one time granular application is recommended at the beginning of the program. Pricing: \$150 for regular insecticide; \$200 for green application!**

**Please give us a call at (508) 756-5197; ask for Dylan!**

\*Applies to Worcester and surrounding towns for properties under one acre; an additional fee will be applied for service outside that zone. Cost for each additional ½ acre (\$1.50/day) is unaffected by zone.
